Product description

Four different snap-in adapters are available for the iPhone™ and bear the following model names: Basic, Music, Media and Media (with fan). Individual functions such as music/media can only be used if the corresponding SAs have been installed in the car.

The **Basic snap-in adapter** primarily keeps the telephone securely in place and charges the battery. The antenna is also inductively coupled.

The **Music snap-in adapter** includes the functions of the Basic model as well as a function for playing music stored on the iPhone™. To do this, the USB audio interface (SA6FL) and extended connection of the music player in the mobile phone SA (SA6NF) are required. **No** combobox (SA6VC) may be installed on these cars.

The **Media snap-in adapter** comprises not only the functions of the Basic and Music models, but also allows cover art to be displayed on the on-board monitor as well as featuring an integrated video interface*.

The Media snap-in adapter is required for SA6FL, SA6NF **and** combobox SA6VC.

The **Media (with fan) snap-in adapter** comprises the Basic, Music and Media functions as well as cooling of the Apple iPhone™. The snap-in adapter is essential with the BMW Apps SA (SA6NR). A fan is activated depending on how much the phone is used, cooling the smart phone. The Media (with fan) snap-in adapter is required for SA6FL, SA6NF, SA6NR and combobox SA6VC.

Overview of snap-in adapters for Apple iPhone™ 4 mobile phones

Sales features/benefits

- Secure and stable docking system for the Apple iPhone™ 3, Apple iPhone™ 4 and Apple iPhone™ 4S.
- Ideal network connection via the car's external antenna.
- Rapid, optimised charging function.
- Integrated USB interface for convenient connection of the music player (without additional cable) in the mobile phone. Only with SA6FL and SA6NF.
- Access to music tracks (audio files) stored on the mobile phone. Only with SA6FL and SA6NF.
- Display of the original album cover for the music track currently being played in the car display (cover art). This function means that songs can be allocated more quickly to an album or artist when listening to them. Only with SA6FL, SA6NF and SA6VC.
- Integrated video interface for playing videos via the on-board monitor. Only with SA6FL, SA6NF and SA6VC.*
